hajohnson3@gmail.com
+46 70 238 34 60

- RESEARCH INTERESTS:**
- Interactive Art
 - Dance and Embodiment
 - Soma Design
 - Ethnography and Intersectionality
 - Sustainability and Ecological Issues
 - Feminist HCI and Design Justice
 - Critical Disability Study and Disability Justice
 - Design Fiction and Participatory Design
 - Environmental Humanities
 - Ethics and Human Centered Technology
 - Workshops
 - Culture and Aesthetics

EDUCATION:

KTH Royal Institute of Technology Stockholm, Sweden June 2026
Master's in Interactive Media Technology
With a Focus on Environmental Humanities

Ohio State University Columbus, Ohio May 2023
Bachelor of Science, Computer Science Engineering, AI specialization
Bachelor of Science, Honors Theoretical Mathematics
Suma cum laude; GPA: 3.9 out of 4.0

Walnut Hills High School Cincinnati, Ohio June 2019
High School Diploma.

WORK EXPERIENCE:

KTH Institute of Technology, Student Amanuens (January 2025 – June 2025)
Stockholm, Sweden
Helped organize a conference focusing on feminist approaches to technology.

- Communicated with attendees to coordinate collecting bios and photos for the website.
- Ran around doing last minute needed tasks during the conference, opening doors, printing zines, and offering sight-seeing suggestions.
- Set-up an exhibition of artist's work, supported in their needs and decorating the space.

Holden Village, Graphic Designer (January 2024 – August 2024)
Chelan, Washington
Supported internal and external communication needs for a nonprofit small recreational village in the North Cascade Mountains.

- Engaged donors by creating a sense of community inclusion through the design of the annual report and spring appeal card, which raised \$24,500.
- Uplifted the community life and guest experience by designing eye-catching signage and bulletin boards to inform an average of 200 guests weekly during peak season.
- Ensured clear communication to prospective guests, staff, and volunteers by redesigning and updating pages on the website.
- Supported the social media needs by taking photos during events and brainstorming captions.

JP Morgan Chase, Data Analysis Intern (June 2021 - August 2021)
Columbus, Ohio
Increased efficiency of the Consumer and Community Banking (CCB) operations by successfully executing 5 data analytic projects.

- Ensured a smooth transition to a new system and facilitated onboarding of employees by interviewing 7 colleagues and documenting the user interface (UI) of the Microsoft Access project tracking database.
- Developed 3 interactive Tableau visualizations of home lending data, effectively illustrating the impacts of COVID-19 and delivering an overview of trends to the team.
- Slashed the time of weekly consistency checks by 70% by engineering an Alteryx automation that enables seamless and efficient database comparisons.

RESEARCH EXPERIENCE:

Digital Futures Summer Research Internship (May 2025 – August 2025)
KTH Royal Institute of Technology, Stockholm, Sweden

Explored communal dance as a method to inform initial design stages around wearable technology for bodies experiencing pain and mobility restrictions.

- Created 3 workshop scores with individual, partnered, and grouped activities exploring different emotional and felt aspects pertinent to the design problem.
- Led 4-9 individuals through activities exploring awareness, agency, and pluralistic bodies, utilizing low-fi prototypes and body maps to facilitate discussions
- Analyzed discussion recordings to uncover insights into the felt experience of vibration, weight, sound tension as well as dynamic reactions in shared space

Fields Institute Research Program

(July 2022 – August 2022)

University of Toronto, Toronto, Canada

Investigated mathematics behind computer vision analysis of Spaceflight-Associated Neuro-Ocular Syndrome (SANS).

- Implemented an open-source Python package for Hyperspectral Image processing with 600 customizable lines of code to meet the parameters of biomedical research scientists.
- Created a foundation for subsequent Python implementations by exploring 3 unmixing and 7 segmentation geospatial Hyperspectral Imaging MATLAB algorithms, encompassing various geometrical techniques.
- Streamlined the identification of the most suitable algorithm for biomedical researchers' input data by creating a script to quantify the accuracy of the segmentation algorithms, pulling 5 measures from current publications.

Knots and Graphs Research Program

(July 2020 – August 2020)

The Ohio State University, Columbus, Ohio

Contributed to advancements in graph theory, working with a research team to generalize Stanley's Acyclic Orientations Theorem for directed and unsigned graphs.

- Synthesized ideas from Stanley's acyclicity theorem for signed graphs using the B-symmetric chromatic polynomial and 3 related theorems to find a viable generalization approach.
- Collaborated with Dr. Stanley to gain deeper insights, utilizing his original inspiration to guide the research.
- Developed a mapping that proved instrumental for the subsequent year's group in achieving the complete generalization. Presented the research findings at the Young Mathematicians Conference.

Ohio State University, Research Assistant

(May 2021 - August 2021)

Columbus, Ohio

Expanded functionality of a software used to conduct psychology research about collaboration and group behavior.

- Added functionality to Breadboard social experiment script in Groovy language.
- Found and fixed bugs as well as improved readability of code.

**TEACHING
EXPERIENCE:**

Ohio State University, Student Instructional Associate

(August 2021 – December 2021)

Columbus, Ohio

Empowered students to conquer the lecture content as a recitation instructor for Math 1075, Precollege Mathematics II, while actively supporting the lecturer's objectives.

- Instructed biweekly recitations, actively engaging students in solving example problems leading to a notable improvement in their understanding of the lecture content.
- Facilitated effective learning and growth by grading for two classes, each consisting of over 30 students, ensuring fair assessment, and providing constructive feedback.
- Mentored students during dedicated office hours, cultivating a positive learning environment by tailoring my explanations to their unique learning style.

Mathnasium of Hyde Park, Tutor

(June 2018 - August 2019)

Cincinnati, Ohio

Tutored K-12 students in foundational and high school level math. Tutored K-12 students in foundational and high school level math

- Translated math concepts to a format that the student could naturally understand.
- Socialized with students and played games to create a positive association with math.

- Coordinated student seating to maximize focus.
- Organized worksheets and test results into binders to create a structured learning environment.

**EMBODIED
EXPERIENCE:**

Dancing Anywhere, Anytime, to Anything (Always)

Everywhere, Earth

I love to dance when the inspiration hits- it does not matter if it's raining or there are people around. My favorite places to dance are in the forest, or by the water, or in empty parking garages or frequented plazas. Most of the time it is to a song that I am obsessed with in the moment as it is pertinent to my emotional world in the moment. Sometimes I have had people come up to me and ask what I am doing, dance with me, or just watch and enjoy the moment. This ephemeral connection is what I value, a chance to show others they can go off the script.

Blue Sky with Omar Keinan

(January 2025 – present)

Stockholm, Sweden

Attended workshops to explore different dance practices offered by other practitioners. These practices are tried on and felt communally, exploring the craftmanship of dance. Then they are reflected upon and queered to see how they evolve in new bodies together.

Sunday School with Anna Grip

(December 2024 – present)

Stockholm, Sweden

Learning from Anna to move the body with less control and finding agility in letting go and reacting. Practicing body awareness and mechanics utilizing wiring, falling, and pushing as psychosomatic prompts. Moving through the floor with the initiation and weight of the feet and letting the forces travel through the body.

Dansskolan Urkraft

(January 2025 – May 2025)

Stockholm, Sweden

Learning a variety of African dance styles including Hip Hop, West African, and Afrobeats. Practicing learning choreography from observation and interpretation as it was taught in a language I don't speak. Being guided by live drummers and listening to their cues of when to dance.

Dance Video Journal Project

(April 2020 – August 2025)

Everywhere, Earth

Healing, learning, and teaching to myself that I am a dancer, and that dance is an enactment of personhood rather than performance. Filming little dance improvisations over the years as the inspiration arose. Creating a vocabulary of my own movement tied to the context of environment, emotional state, musical inspiration and the history of forces on my body.

Holden Village

(January 2024 – August 2024)

Chelan, Washington

Created a safe space for others to explore the connection with their body by leading weekly intuitive movement classes for multi-generational groups ranging from 5 to 15 people. Inspired kids ages 4 to 10 to have fun by teaching a weekly dance class at the children's summer program. Cultivated a sense of community and highlighted African American culture by teaching Swing dance and its history. Ended with a very emotional contact improv duet to live improvised piano music.

Flux and Flow

(July 2023)

Columbus, Ohio

Participated in a variety of unique classes at a small multi-generational dance studio. Practiced improvisation and internal connection during Contemporary Flow. Contributed to a safe environment to explore joy by dancing with a multi-generational group of individuals during Club Flow and Dance Party.

Ohio State University Dance Department

(August 2020, August 2023 – May 2023)

Columbus, Ohio

Took three semester long classes with the Department of Dance at OSU. Focused on sustainable movement and emotive dancing in the Ballet class. Practiced dancing from the inside and

improvisation in the Contemporary class. Described and analyzed movement in a writing about dance class.

OSU Swing Dance Club

(August 2022 - August 2023)

Columbus, Ohio

Danced East Coast Swing, specifically Lindy Hop and solo jazz. Practiced intuiting partner movement and invitational leading. Participated in several social dances, mostly in Columbus but also in Toronto, Chicago, and Cincinnati.

Momentum Contemporary Ballet

(August 2020 - January 2022)

Columbus, Ohio

Worked on healing relationship with dance at weekly open ballet classes. Focused on enjoying movement and not pushing body. Choreographed and taught a piece for the autumn semester performance.

Dimension Fitness

(Jan 2018 - August 2019)

Cincinnati, Ohio

Applied movement knowledge from dance to a different physical space when learning Aerial Hoop. Strengthen necessary muscles and learned new embodied vocabulary during weekly classes.

De La Dance Center

(2005 - 2017)

Cincinnati, Ohio

Studied ballet at a small family-owned ballet studio. Also learned other dance forms including Tap, Modern, Character, and Pilates. Performed in multiple performances including the Nutcracker, Cinderella, and Coppelia. Participated in several summer intensives where I danced 5-7 hours each day.

**VOLUNTEER AND
LEADERSHIP
EXPERIENCE:**

A Space to Wonder, *Artistic Director and Dancer*

(March 2025 - October 2025)

Stockholm, Sweden

Initiated an interdisciplinary collaboration to create an immersive installation to create a place from people to be in awe collectively and celebrate the guiding role of the night sky.

- Ideated, sketched, and prototyped to develop the direction and theoretical lens of the project.
- Adapted to problems of waterproofing, suspending weight, and finding the right materials to convey the intended aesthetic experience.
- Soldered LEDs, programed Arduino- gyroscope connections, and laser-cut acrylic pieces.
- Performed a improvisational dance piece to introduce the space and possibilities for interaction, guiding in audience members to facilitate experiencing awe.

Stockholm Fring Festival, *Jury Member*

(August 2025)

Stockholm, Sweden

Served as a jury member, providing feedback and reflections used in determining awards.

- Attended, undercover, a total of 9 performances, actively engaging with the work, its messages, and the artistry with an open mind.
- Reflected on the experience, describing colorfully the performance and giving critical feedback identifying the strengths and weaknesses of each piece.
- Nominating certain pieces for specific award categories, depending on their merit.

Herräng Dance Camp, *Cleaning crew*

(July 2025)

Herräng, Sweden

Volunteered to help the logistics of promoting the learning, sharing, and enjoyment of the culture of swing dance.

- Cleaned bathrooms coordinating with a crew to share a divide tasks, making sure everyone felt supported.
- Attended classes from elders and skilled dancers in swing, tap and jazz.
- Danced the evening away, socializing with people from all over the world.

NOT YOUR BODY, just my shadow;

(December 2024)

Stockholm, Sweden

Organized and ran a workshop on the ownership technology holds on our bodies.

- Democratized the conversations about ethics concerning body.
- Led a movement exercise with shadows to sensitize participants on their bodily form.
- Reflected on the experience and used it to inform a conversation about when, how, and where movement data should be used.

Holden Village, Kitchen Assistant

(October 2023 – December 2023)

Chelan, Washington

Lived and volunteered in a small community in the mountains of Washington as a kitchen assistant.

- Prepared 3 meals a day for over 70 people, ensuring balanced and allergen contamination free sustenance.
- Upheld food safety procedures, organization, and time management to create a clean kitchen environment.
- Predicted needs of head cook and delegated tasks with fellow kitchen assistants to ensure efficient workflow.
- Worked as a barista for the local coffee shop, Beanies, taking orders with espresso and frothed milk.

Diversity and Departmental Climate Committee,

(August 2020 – May 2023)

Columbus, Ohio

Served as the undergraduate representative for the Math Department DDCC at Ohio State University.

- Advocated for more virtual supports and offerings during the Covid-19 Pandemic to make classes more accessible and inclusive.
- Conceptualized the structure and function for the Cycle Program to help support underrepresented students in their first year of mathematics and create access to research opportunities.
- Proposed to drop the GRE requirement for graduate admissions to lower opportunity barrier for students with intersectional backgrounds and increase diversity in the graduate program.

Association of Women in Math, Social Media Chair

(August 2020 – May 2023)

Columbus, Ohio

Ran the social media for the OSU chapter of Association of Women in Math.

- Designed unique colorful posters to advertise events, like monthly teatime, with the target of creating a safe and supportive community.
- Scheduled Instagram posts and stories to inform about the club happenings and encourage engagement.
- Planned special events like Integral Bowl and Pi Day to connect with the wider community.

Buckeye Aha! Math Moments (BAMM)

(August 2020 – Jan 2022)

Columbus, Ohio

Volunteered with the OSU Math Department outreach group to promote diversity and enjoyment of mathematics by working with middle school and high school students.

- Empowered students to create and use algorithms by teaching an introductory Python course during the summer camp.
- Offered advice to younger generations and verbalize a shared experience by speaking on a panel about my experience as woman in math.

**CONFERENCES AND
WORKSHOPS:**

Nordic STS conference

(June 2025)

- Chaired panel on Environment and Sustainable Transitions, keeping track of time and introducing presenters.
- Presented my research into the intersection of disability and environmental crisis, looking to artists to understand important shared qualities of this intersection.

Disability Theory in HCI

(October 2024-November 2024)

- Participated in a workshop on Disability Theory in HCI led by Rua M Williams, funded by AccessComputing which addressed how the different models of disability often lead to problematic approaches in designing and working with this community.

- Discovered the current failures of HCI for disabled stakeholders and implemented alternate affirming design methods.
- Created two sketches for a design jam which won the "Sketch Notes with Threatening Auras" and "I just think they're neat" awards.

Arts of Scholarling on a Damaged Planet

(November 2024)

- Discussed the role of academia in the Anthropocene in a workshop organized by Iván González Iglesias with the KTH Environmental Humanities Lab.
- Learned from a panel of artists, activists, and scholars about their lived experience of working with institutional.
- Crafted speculative stories in fictional worlds to examine the paradoxes that arise when innovating and pushing boundaries in these systems.

Soliya Global Circles

(September 2023)

- Engaged in dialogue about the impact, ethics, and responsibility surrounding issues arising from digital transformation.
- Listened to stories about technology impact on a local scale from people located all over the world including Tunisia, the U.S., and Yemen.
- Shared personal experiences and perspective on the transformational aspect of emerging technology.

Connecting the Body to the Natural World

(April 2023)

Ohio State University, Columbus, Ohio

- Participated in a dance activism workshop lead by Brother(hood) Dance! and Global Water Dances Columbus.
- Engaged actively with discussion and knowledge sharing surrounding the global water crisis and inaccessibility of clean water.
- Embodied cultural knowledge and appreciation for water by learning traditional African dance steps.

Young Mathematicians Conference

(August 2020)

Ohio State University, Columbus, Ohio

- Presented the results of the Knots and Graphs Research Program.
- Learned a wide breadth of current mathematical research.
- Introduced to a variety of new hot topics in math research.

SKILLS:

- | | |
|--|------------------------------------|
| • Figma, Miro | • Creative Problem Solving |
| • Audacity and Ableton Live | • Communicating Abstract Concepts |
| • Adobe InDesign, Illustrator, and Photoshop | • Interviewing |
| • WordPress and Elementor | • Ideation and Sketching |
| • Python, Java, C#, Html, C | • Analysis of Qualitative Data |
| • Unity, WebGL | • Leading Workshops |
| • GitHub, Excel, MATLAB, AutoCAD | • Networking and Connecting people |
| • Tableau, Alteryx, SQL | • Graphic Design |
| • Object Oriented Programming Skills | • Arduino |
| • Running social media | • Soldering |
| • Hair cutting and styling | • Laser-cutting |
| • Food prep | • Basic wood tool operation |
| • Food Safety | |
| • Espresso machine operation | |
| • Pottery | |
| • Dance | |
